

CYBER FORENSIC

From First Byte to Final Verdict

TRUSTED EXPERTS IN
**DIGITAL
FORENSICS**

SECURE. ANALYZE.
PRESENT.

NETRA 2.0

Facial Recognition System

Features

- Face Detection
- 1:1 Verification
- 1:N Gallery Search
- Ranked Candidates
- Video Frame Extraction
- Handles Pose & Lighting Variation
- Batch Processing
- Fully Offline

Praman 1.0

Image & Video Enhancement & Authentication

CREATE MISSION-FOCUSED CAMPAIGNS USING DIGITAL IDENTITIES ACROSS SOCIAL NETWORKS.

Features

- **TAMPER DETECTION** Identify indicators consistent with digital editing or manipulation.
- **DEEPFAKE INDICATORS** Surface characteristics associated with synthetic or AI-generated media.
- **METADATA & INTEGRITY ANALYSIS** Review available metadata and check for consistency and integrity.
- **CONFIDENCE-SCORED ASSESSMENT** Provide a structured confidence score to support the analyst's evaluation.
- **ANALYST REVIEWED** The forensic examiner remains responsible for the final determination.
- **63 COURT REPORT** Generate documentation suitable for legal workflows and court proceedings.

Gait Analysis System

Identify a person by how they walk — even when the face is never seen.

Features

- The Challenge
- What It Does
- How It Works
- Key Benefits
- Forensic Integrity
- In Action

PC-3000 Portable PRO Systems

TOP TOOL FOR ANY DATA RECOVERY CHALLENGE

Features

- Make your own workstation out of one device
- Connected drives are isolated from possible OS changes
- Hardware Write Protection
- Logging and reports Generation

PC-3000 Mobile Pro

NEW SOLUTION FOR MOBILE DEVICES

Extract data from locked mobile devices

Features

- Get data access even if mobile devices are locked, switched off or damaged
- The power of PC-3000 technology for low-level access to mobile devices

DP10 - Purpose-built, Mobile Forensic Evidence Acquisition Device.

Quickly triage and acquire evidence and intelligence.

- Case Management
- Triage
- Acquire
- Report and Search
- Triage and acquire evidence and intelligence from phones, tablets, watches, USB drives, drones, and many other devices.

Detego® Ballistic Imager - Product Overview

A patent-granted capability which is the world's fastest imaging tool. Trusted by world-leading national and international Law Enforcement Agencies and Military organisations.

Features

- Portable power in your pocket APA – Artificial Digital Persona
- Rapid imaging
- Typically deployed in Covert Operations, Surveillance, Border Security, Sensitive Site, 'Tactical Media Exploitation' and Corporate Investigations

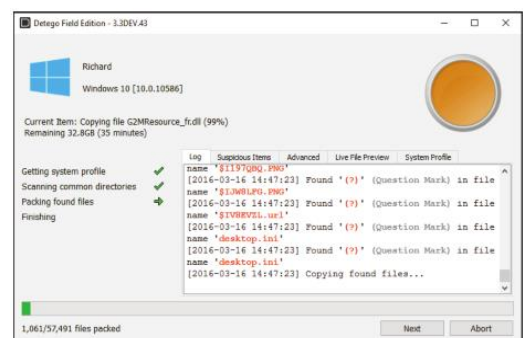

Detego® Field 'Triage'

Overview

The complete portbale digital forensic solution for the field.

Features

- Highly configurable search profiles APA – Artificial Digital Persona
- No constraints
- Watch the lights

Falcon-NEO2-DS-v1.1 Forensic Imager

The premier future-proof and scalable digital forensic imaging platform for streamlining collection processes

Features

- Image and verify to multiple image formats;
- APFS Support
- Built-in support for SAS/SATA/USB3/PCIe
- Secure sensitive evidence data
- Network Capture
- Wipe drives to DoD specifications

711 Magic Box

Extract BitLocker recovery key without disassembly

Features

- High Compatibility Compatible to Various Window PC
- Pre-Scan Function
- One-Click Extraction
- Quick Extraction

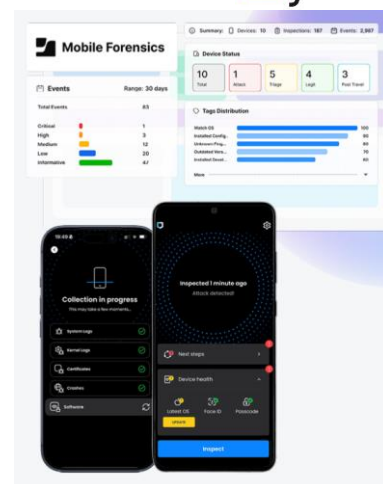

Jamf Mobile Forensics

Defend mobile devices against the most sophisticated attacks.

Features

- **Threat detection** – Detects mercenary spyware, zero-click exploits, APTs, and nation-state attacks without rooting or jailbreaking.
- **Privacy-first scanning** – Never collects PII like passwords, photos, messages, contacts, or call data during forensic scans.
- **AI Analysis** – One-click AI-powered analysis acts as a forensics expert, cutting investigation time from hours to minutes and reducing the need for deep forensic expertise.
- **SOC & rules engine** – Automatically groups events into unified incidents for fleet-wide monitoring, customizable rules engine, allow-list, or block-list indicators of compromise.

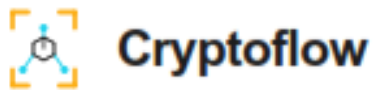

Cyacomb Forensic

The gold standard in rapid triage Cyacomb Examiner Plus

Features

- Digitally enables frontline policing
- Empowers law enforcement to make quick decisions
- Rules out devices not relevant to the investigation
- Significantly reduces risk
- Quickly clears devices and case backlogs

Crypto forensics for law enforcement

CRYPTO FORENSICS FOR LAW ENFORCEMENT

Features

- Trail Goes Cold at the Exchange
- Privacy Chains Break Everything
- Weeks Per Case
- Global Tools, Local Blind Spots

Restoring Trust and Authenticity for Governments & Law Enforcement Agencies

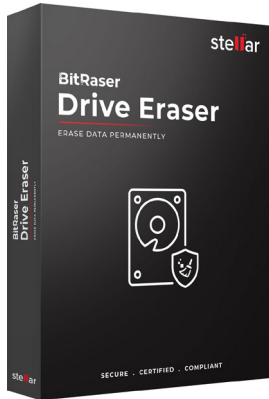

Cyabra Supports Governments Dealing with Influence Operations

Features

- Authenticity & Behaviour Assessment
- Cross-Platform Narrative Mapping
- Synthetic Media & Impersonation Detection
- Multi-Language Intelligence

Stellar Software Solutions – Secure Data Management, Recovery & Compliance Suite

BitRaser Drive Eraser

Secure Drive Erasure | Ideal for Enterprises & Government Agencies

An advanced data-sanitization solution designed to permanently erase storage devices with full compliance and audit-ready documentation

Key Capabilities

- Certified secure erasure meeting global standards
- Cloud dashboard for real-time monitoring
- Digitally signed, tamper-proof erasure certificates
- Comprehensive audit-trail reporting
- Supports automation and bulk erasure workflows
- Seamless API integration
- Centralized management for large deployments

Stellar Password Recovery for Windows

Instant Windows Login Password Recovery

A reliable utility to reset forgotten or inaccessible Windows administrator and user passwords across a wide range of systems.

Key Capabilities

- Certified secure erasure meeting global standards
- Cloud dashboard for real-time monitoring
- Digitally signed, tamper-proof erasure certificates
- Comprehensive audit-trail reporting
- Supports automation and bulk erasure workflows
- Seamless API integration
- Centralized management for large deployments

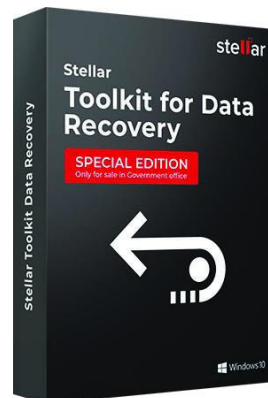

Stellar Toolkit for Outlook

8-in-1 Suite for Outlook Data Management

A powerful toolkit to repair, restore, optimize, and manage Outlook data files with precision and zero data loss.

Key Capabilities

- Repairs corrupt PST files
- Recovers data from inaccessible OST
- Splits bulky PST files for easier handling
- Compacts PST to boost performance
- Merges mailboxes without data loss
- Removes duplicate emails
- Recovers deleted or missing mailbox items

Stellar Toolkit for Data Recovery

Complete DIY Data Recovery Suite | Made in India

A comprehensive, all-in-one solution to recover lost data from Windows, macOS, Linux, RAID arrays, and virtual environments.

Key Capabilities

- Recovers data across Windows, macOS, & Linux systems
- Rebuilds RAID configuration for recovery
- Supports virtual drive data recovery
- Add-header support for precise file reconstruction
- Recovers data from encrypted drives
- Enhanced preview of recoverable files
- Supports 4K sector hard drives
- Deep Scan for maximum-possible recovery

SIMPLE. POWERFUL PHOTO RECOVERY

Powerful yet user-friendly tool that restores lost or deleted photos and videos from SD cards, USB drives, HDDs, SSDs & 4K drives. It supports recovery after accidental deletion, formatting, or file corruption

Features

- Recovers Lost or Deleted Photos
- Recovers From All Storage Devices
- Recovers From BitLocker Encrypted Drives
- Add your Own File Type for Recovery
- Option to Pause & Resume an Ongoing

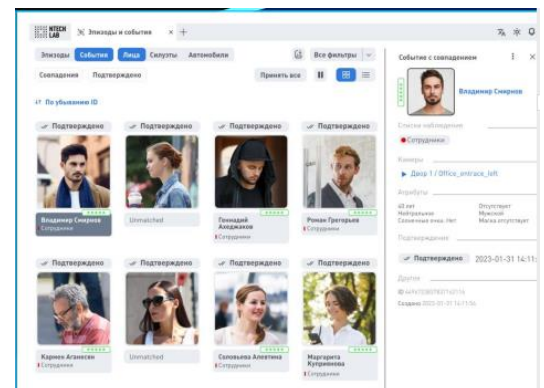

FindFace Multi

a multi-object video analytics platform designed to meet cities actual needs with ready-to-use scenarios

Features

- Precise algorithms
- Wide range of attributes
- Recognitions in difficult
- Conditions
- Certified Ntech_Liveness

Atola TaskForce

Features

- Wiping with various methods
- Browse files on any connected device
- SMART viewing + recording it before and after image acquisition
- Hash calculation (linear and segmented): MD5, SHA1, SHA256, SHA512
- HPA & DCO control and recovery

Atola TaskForce 2

Features

- 25+ imaging sessions in parallel (plus other tasks)
- 25 TB/hour cumulative speed of imaging
- Imaging of 500+ MB/sec on SSDs, 4 GB/sec on NVMe
- 2 x 10 Gb Ethernet ports
- Source/target switch on all ports for maximum flexibility
- Write protection in Source mode on all ports

OSINT CENTER

**MONITORS GROUPS, KEYWORDS, AND PROFILES TO
GENERATE ACTIONABLE INTELLIGENCE.**

Features

- Multilingual content generation
- APA – Artificial Digital Persona
- Campaign Creation
- Reporting

MASS PROFILER

**COUNTRY-SCALE PROFILING ENGINE DELIVERING TOTAL
IDENTITY INTELLIGENCE IN REAL TIME**

Features

- Population-Scale Profiling
- Automated Data Enrichment
- Real-Time Updates
- Identity Correlation

XRY Pro

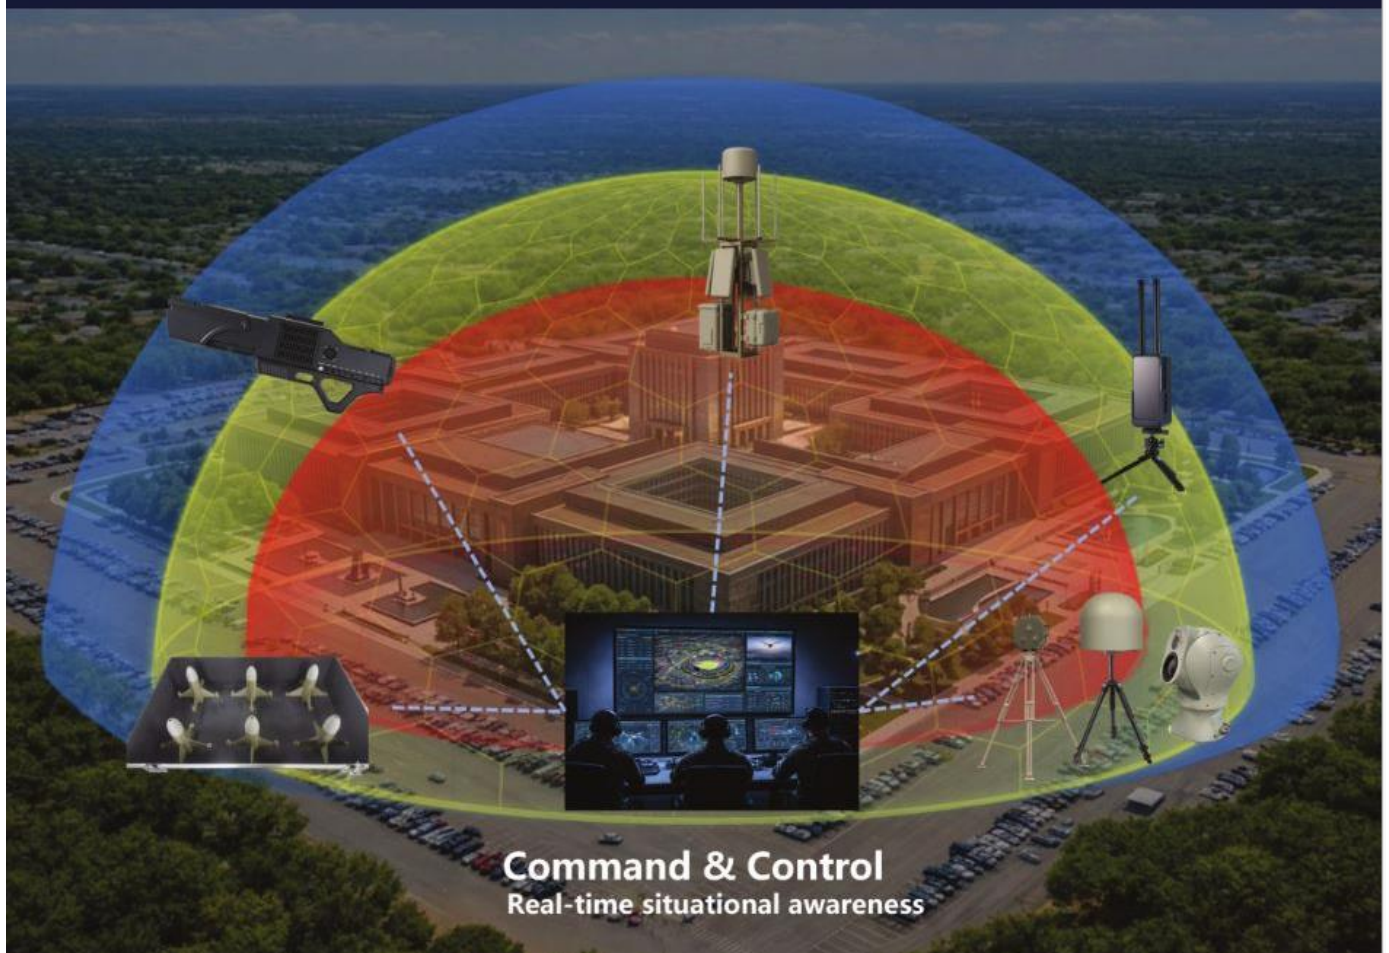

**XRY Pro delivers cutting-edge exploits and can be installed on
your existing equipment.**

Features

- Advanced software with the latest Bruteforcing and extraction
- Automated Data Enrichment
- FDE, FBE and Secure Startup support.
- Password bypass for AFU devices along with Bruteforcing for BFU devices.

360° PROTECTION SOLUTION

Detection & Early Warning Zone - (Blue Zone)

Features

- Flight Path Tracking
- Operator Positioning
- Threat Level Evaluation

Soft-Kill Zone - (Yellow Zone)

Features

- RF Area Denial
- Continuous Threat Tracking
- Tactical Trajectory Logging

Hard-Kill Zone - (Red Zone)

Features

- Kinetic Drone Neutralization
- Hard-Kill Interception
- Autonomous Pursuit & Impact

D200 Pro: Multi-Protocol, Multi-Band Drone Detection

Features

- Detect 300+ popular drone models
- Support Drone Remote ID (RID)
- Drone flight path tracking and pilot positioning* Capability

Capability	Our Solution	Typical Portable Systems
Mission Endurance	Up to 10 hours continuous operation	3–4 hours
Detection Range	Up to 5 km**	Up to 3 km
Detection Methods	Protocol decoding + RF signature + Remote ID	Remote ID or protocol only

DF100: Multi-Band Precision Drone Mitigation

Features

- Multi-Band UAV Disruption
- Directional Rapid Neutralization
- Safe Forced Control

Capability	Our Solution	Typical Jammer Systems
Jamming Bands	8 Configurable jamming bands	4–6 Fixed bands
Output Power	High-power configurable output (50 W / 100 W for key bands)	Fixed power output
Hardware Design	Modular and detachable architecture	Integrated all-in-one design

D360: Long-Range Passive RF

- **Extended Detection Range** Provides an ultra-long detection radius of up to 10 km
- **Advanced Signal Intelligence** Protocol decoding, RF signature, and Remote ID, 3 in 1

- **Wide & Customizable Frequency Coverage** Features a versatile frequency range from 70 MHz to 6 GHz
- **Superior FPV & Operator Localization** optimized for Direction Finding (AOA) of FPV drones
